[Certificates](#)

PROJECTS WORK

LPI (Licence Plate Identification System)

- **Summary:** Me and my team (Bug_Busters) worked on LPI. We made it for the Mastek deep blue Season 7. Done research on various algorithms and designing , Created a dynamic website which interacts with our backend code and provides the data from data base to main server with very less latency. Our main focus is to create fast and accurate License plate identifier Web app in Django.
- Team Members: 3
- Duration of project : 2 months

Voice Assistant
- Created a basic voice Assistant like Jarvis .
- Functionality : a basic chat-bot , voice recognizer , playing songs ,videos on voice commands
